

CRM Solutions

from South West ICT

Summary of Products Supplied

	<p><i>easyCRM is for the serial networker. Never lose those business card details, never forget to follow up opportunities and start proactively marketing to your contacts today, all for just £249.00 per annum</i></p>
	<p><i>SugarCRM Community Edition is the World's leading Open Source CRM solution. For small to medium sized businesses looking to keep on top of their sales pipeline and customer service operation, SugarCRM leads the market. From £500 per annum SugarCRM CE comes with a free unlimited user license</i></p>
	<p><i>info@hand is a comprehensive suite of business management tools that includes extensive CRM capabilities as well as providing a rich set of accounting functions. info@hand comes with a customer portal providing your customers with direct access to view and update key information held in your info@hand system (e.g. create a helpdesk issue, update contact details)</i></p>
	<p><i>info@hand for QuickBooks Pro completes the 360 degree business cycle by seamlessly sharing information between info@hand and your QuickBooks finance system. At a push of a button, sales quotations become invoices which become ledger items in QuickBooks.</i></p>

All solutions are installed and supported through South West ICT. Linux-based web servers are provided and optimized which means that your users have trouble free computing. All they need is a web browser and access to the Internet.

System availability is 24 hours a day 7 days a week 365 days a year with a guaranteed uptime of 99%.

What is **easycrm**?

easycrm is a web-based sales, marketing and customer handling application. The application is based on the well known SugarCRM Community Edition but has been heavily customized by South West ICT to suit a small business or networker. It is the ideal choice for a business that needs a simple, easy to use, contact management solution to address the following business needs.

- A place to keep names and addresses of people you have met
- A system to record notes, meetings, conversations with people
- A reminder system to prompt you to call people
- A way to categorise people into 'target' groups
- An email marketing facility providing the ability to create marketing templates, attach target groups, send mass emails, track bounces, click-thrus, opt-outs etc.
- A calendar facility to keep track of your appointments. Appointments can be linked to people in your database so that past activity with an individual can be found quickly and easily.
- A group calendar facility so you can see the diaries of your colleagues
- An email solution that sends and receives email. Again these emails are automatically linked to people in your database where applicable

The great thing about **easycrm** is that you won't outgrow it! As your needs expand so will **easycrm**. You begin with a heavily cut down feature-rich application that can grow by simply 'switching on' new features or installing standard components. So if you need to track sales, create quotations, run projects or implement a customer helpdesk solution, its **easycrm**

All you need to get started is a web browser and Internet connection. Place your £249.00+VAT purchase via credit card or PayPal and South West ICT will install your very own **easycrm** and contact you with the web location and your secure userid and password.
